

Case study: collapsing a 25-node BGB SCC into an inspectable risk core

A. Original SCC context: risk endpoints are far apart inside a legal-reference cycle

B. Final dynamic core

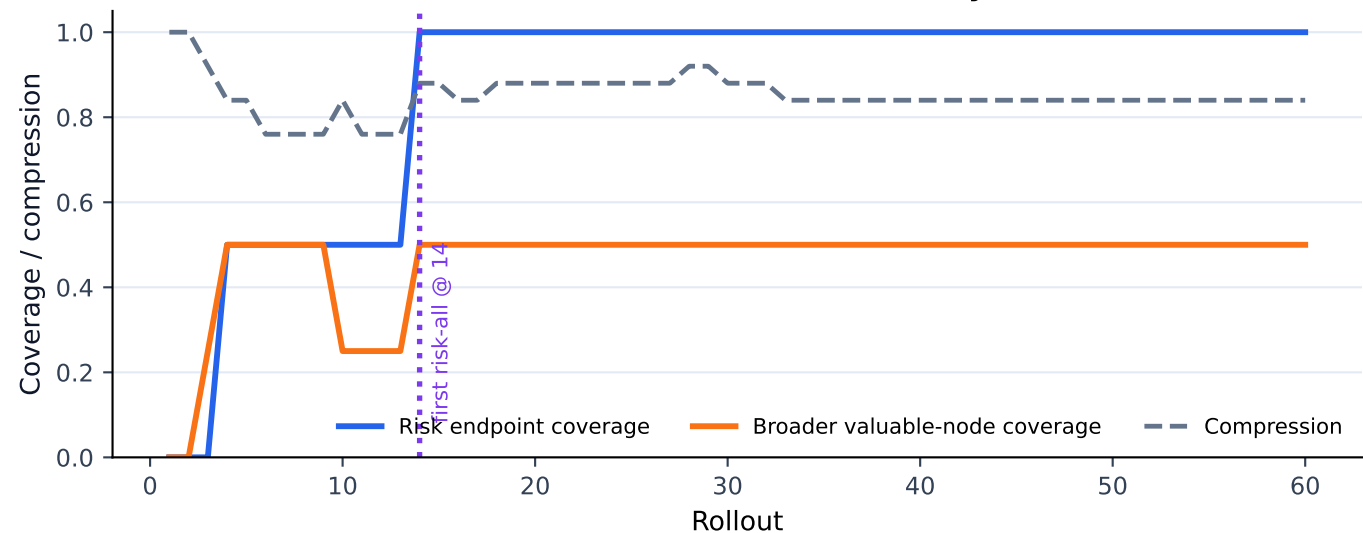

9/25 nodes retained

compression = 64%

Core contains:

\$356
\$491a
\$491
\$505
\$512
\$312f
\$495
\$358
\$514

C. Rollout trace: evidence is retained after discovery

D. Same case outcome

Root@3 Naive **No** SA **Yes**

Risk-any Naive **Yes** SA **Yes**

Risk-all Naive **No** SA **Yes**

Template: Handoff invariant

Root: \$505

Witness: \$491
